Is your data-type currently supported in AKN??

Secretive Marshbird surveys that use **playback**

I collect **habitat and weather data** associated with my bird surveys

Linear transects (walking or road) that **don't have defined stopping points**

Standard **multi-species point count surveys**

Single or **select species** surveys that follow a **point-count** methodology

Select species survey that uses **playback**

ARU Point Counts

Area search

eBird checklists

Species checklists

Colonial waterbirds

Raptor surveys

SITE CONDITIONS

SECRETIVE MARSHBIRDS

LINEAR TRANSECT

POINT COUNTS

AREA SEARCH

BASH
Surveys of **airfields** for **living birds**

BASH
Mortality data

SUPPORTED!

Acoustic Recording Unit (ARU) raw audio

Territory mapping or **spot mapping**

Color banding and **resighting**

Animal movements (e.g., telemetry data or Motus)

Nest monitoring

Bird **capture** and/or **banding**

I record **incidental observations** of **important species** observed on the installation

NOT SUPPORTED …YET!

But don't worry!
Our team is constantly updating available protocols, so let's touch base and see what we can do!

Other **demographic data** (e.g., fledgling counts, nest counts, brood data)

I collect data that **I'm not sure** fits into one of these formats

I have a **species-specific protocol** that is **a mix of two or more of these methods**

IT'S COMPLICATED…

We may or may not have a protocol for you, but we need a little more information. Consult with an AKN team member for advice.
